SUMMARY

Data scientist with a strong background in machine learning, statistical modeling, and artificial intelligence, with experience in a variety of domains including data analysis, predictive modeling, and generative AI. Adept at translating complex data sets into actionable insights and developing AI-driven solutions for business optimization. Proven track record of improving forecasting accuracy, enhancing operational decision-making, and creating innovative data-driven products. Open to opportunities in data science, machine learning, and AI research roles.

EDUCATION

Texas A&M University

Master of Science, Data Science, Statistics

- **GPA:** 3.2/4.0

Aug 2023 - Dec 2024

College Station, TX, USA

NMIMS University

Bachelor of Technology, Computer Engineering

- **GPA:** 3.32/4.0

Aug 2019 - Aug 2023

Mumbai, Maharashtra, India

WORK EXPERIENCE

Texas A&M University

Research Analyst

- Built predictive models leveraging regression and classification methods on large datasets (30K+ observations) to forecast environmental risks.
- Increased predictive accuracy by 15% through feature engineering and seasonal decomposition of time-series data.
- Automated analytical dashboards in Power BI and SQL, effectively communicating findings across technical and non-technical stakeholders.
- Applied rigorous statistical validation techniques (cross-validation, hypothesis testing) ensuring robust and reliable model outcomes.

Dec 2023 - Dec 2024

College Station, TX, USA

Arcitech.AI

QA Analyst & ML Project Lead

- Led QA automation for ML pipelines using Python, Selenium, REST APIs, and CI/CD environments.
- Conducted validation, regression testing, and user simulations to ensure high-quality, reliable deployments.
- Delivered detailed weekly analytics and reporting, enhancing transparency and auditability of model performance and anomalies.

Apr 2022 - Nov 2022

Mumbai, Maharashtra, India

PROJECTS

Telco Customer Churn Modeling Using Survival Analysis and Explainable ML | <https://git.new/e4uhuVy>

May 2025

- Built customer churn models using Kaplan-Meier and Cox Proportional Hazards to effectively forecast retention probabilities.
- Achieved a robust predictive performance with an ROC AUC score of 0.833, showcasing strong model accuracy.
- Utilized SHAP for model interpretability, clearly identifying key drivers of customer churn.
- Created detailed survival analyses and generated strategic business insights to enhance customer retention decisions.

Behavioral Recommender System with PySpark

Sep 2024

- Developed a scalable hybrid recommendation engine integrating collaborative filtering (ALS) and content-based filtering techniques to deliver personalized product recommendations.
- Leveraged PySpark for processing and analyzing large-scale customer behavioral datasets, significantly reducing computation time and ensuring efficient scalability.
- Deployed the system using AWS Lambda, enabling real-time responsiveness and seamless integration into product workflows.
- Conducted rigorous A/B testing and visualized key engagement metrics using Power BI, improving user engagement through data-driven recommendations.

SKILLS

- **Skills:** Machine Learning, Data Science, Gen-AI, Data Analysis, Recommendation Systems, Statistical Modelling, RAG pipelines, Prompt Engineering, Explainable-AI
- **Programming Languages:** Python, R, C++, SQL
- **Machine Learning Libraries:** Sci-kit learn, TensorFlow, PyTorch, Pandas, CUDA
- **Statistics Libraries and Skills:** Numpy, Statsmodels, A/B testing, EDA, Seaborn, SHAP, XGboost
- **Analytics and Visualization:** Tableau, PowerBI, Alteryx, SAS, Google Analytics, Adobe Analytics, Chartbeat, Elixir
- **Databases:** SQL Server, BigQuery, Oracle
- **Cloud Technologies:** AWS, Apache Spark, AirFlow, Kafka, GCP
- **Version Control:** Git, Docker, Jira
