Dallas, Texas | +19452087240 | princetibadia00@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SUMMARY

Data professional with a strong foundation in statistical analysis, machine learning, and business intelligence. Proven track record of translating data into actionable insights across clinical, environmental, and financial domains. Proficient in SQL, Python, Tableau, and AWS with experience in KPI reporting, geospatial analysis, and model deployment. Adept at stakeholder communication and delivering data-driven strategies to drive decision-making.

WORK EXPERIENCE

Clinical Data Solutions LLC | Data Analyst

Jan 2025 - Present

- Developed automated KPI dashboards in Tableau and SQL to track clinical performance metrics, improving reporting efficiency by 30%.
- Conducted ad-hoc analyses using BigQuery and Google Analytics to support operational decisions, leading to improved business performance optimization
- Automated reporting workflows using Python, reducing manual processing time by 35%.
- Worked with various teams to define performance indicators and ensure accurate data for strategic decisions.

Texas A&M University | Environmental Data Analyst

Dec 2023 - Dec 2024

- Cleaned and analyzed 33,000+ time-series bacterial contamination records across Texas beaches using Python and Pandas.
- Developed predictive time series models to support data-driven decision-making and environmental monitoring.
- Created GIS heatmaps identifying contamination hotspots and correlated with rainfall and sea level trends.
- Monitored footfall data and performed multivariate regression to uncover potential contamination drivers.
- Presented findings to the Texas General Land Office via interactive dashboards and executive briefings.

Arcitech.AI | Data Scientist

Apr 2022 - Apr 2023

- Built ML models to evaluate stock portfolio risk; applied Random Forest and XGBoost for risk scoring.
- Deployed models on AWS using EC2 and S3; implemented API-based inference pipeline.
- Achieved 22% improvement in prediction accuracy via hyperparameter tuning and ensemble modeling.
- Collaborated with product teams to integrate ML insights into a SaaS-based financial dashboard.

PROJECTS

Financial Time-Series Modeling for Portfolio Risk | Arcitech.AI

- Built a multi-factor risk model using time-series and correlation analysis on synthetic portfolio data.
- Integrated regression-based risk forecasts into a backend pipeline and deployed using AWS Lambda + S3.
- Implemented portfolio stress tests simulating market shocks; achieved RMSE reduction of 19% via feature selection and tuning.

Demand Sensing & Fraud Detection in Online Retail | Texas A&M University

- Engineered 30+ features including reorder intervals, cart sizes, and item popularity.
- Built XGBoost model with precision of 87% for fraud prediction and stockout forecasting.
- Visualized SHAP values to explain model behavior for business analysts.
- Suggested pricing and restocking strategies based on customer churn signals.

Credit Card Fraud Detection with Imbalanced Data | Texas A&M University

- Built a binary classification pipeline on anonymized credit card transactions to detect fraudulent activity.
- Addressed extreme class imbalance using SMOTE and undersampling techniques; achieved 94% precision on fraud class using XGBoost.
- Visualized high-risk patterns by transaction time and amount, and applied feature importance to guide fraud detection policies.
- Deployed results via a dashboard showcasing false positives and key indicators for real-time monitoring.

EDUCATION

Texas A&M University | Master of Science, Data Science, Statistics

Aug 2023 - Dec 2024

NMIMS University | Bachelor of Technology, Computer Engineering

Aug 2019 - Aug 2023

SKILLS

- **Programming Languages:** Python, R, SQL, Bash
- **Tools:** PowerBI, Tableau, MS Excel, Google Analytics, Adobe Analytics, Jupyter, Git, Docker
- **Libraries:** Pandas, Scikit-Learn, XGBoost, TensorFlow, PyTorch, Statsmodels
- **Cloud And Big Data:** AWS (EC2, S3, Lambda), GCP, BigQuery, Airflow, Oracle, Spark, Hadoop
- **Key Skills:** Data Storytelling, Predictive Modeling, KPI Reporting, Scorecard Metrics, Customer Segmentation, A/B Testing, Time Series Analysis, Agile Methodology
